

INVITED TALKS EINN95

Nucleon Polarizabilities; <i>Jürgen Ahrens</i>	2
The Axial Anomaly and Spin Structure Functions; <i>G. Altarelli</i>	3
What do we learn from the study of spin degrees of freedom in electron-deuteron scattering?; <i>Hartmuth Arenhövel</i>	4
Ejectile Polarimeters; <i>Th. S. Bauer</i>	5
Spin-Dependent Deep-Inelastic Positron-Nucleon Scattering; <i>J.F.J. van den Brand</i>	7
Polarimeters for Lepton Beams; <i>Christian Cavata</i>	8
Polarized Electron Sources for Accelerators; <i>J. E. Clendenin</i>	9
Measurement of nucleon polarized structure functions by the SMC; <i>J.M. Le Goff et al.</i>	11
Q^2 Dependence of the Quadrupole Contribution to the $N \rightarrow \Delta$ Tran- sition; <i>R. W. Gothe</i>	13
Polarized Hydrogen and Deuterium Gas Targets; <i>W. Haeberli</i>	14
Experiments on the Spin Flavour Structure of the Nucleon; <i>D. von Harrach</i>	15
Nucleon Form Factors; <i>Werner Heil</i>	16
Measuring the Gerasimov-Drell-Hearn Sum-rule at MAMI and ELSA; <i>N. d'Hose et al.</i>	18
Nucleon Spin Structure Functions: Experiment, Theory and Im- plications;	

<i>Marek Karliner</i>	20
Nucleon Structure in Chiral Perturbation Theory; <i>Ulf-G. Meißner</i>	21
Solid Polarized Targets -Latest developments for new experiments; <i>W. Meyer</i>	23
Flavor Content of Nucleons and Nuclei: Theory; <i>M. J. Musolf</i>	24
Focal plane polarimeters: a cost effective method to use spin de- grees of freedom; <i>Eddy Offermann</i>	25
Structure Functions and Polarization in Electromagnetic Knockout Reactions; <i>F.D. Pacati</i>	27
Spin Correlations in Nuclei; <i>V.R. Pandharipande</i>	29
Electron scattering off tensor-polarized deuterium; <i>Erik Passchier et al.</i>	30
Measurements of Nucleon Spin Structure at SLAC; <i>Gerassimos Petratos</i>	32
Inelastic Electron Scattering from the Three-Nucleon Bound States with Polarization; <i>P.U. Sauer et al.</i>	33
Polarization Monitors For Polarized Gas Targets; <i>E. Steffens</i>	34
Three Ways to Polarize ^3He; <i>Alan K. Thompson</i>	35

Oral Presentations

Electron Scattering with Out-of-Plane Spectrometers and Polarized Electrons; <i>Ricardo Alarcon et al.</i>	38
A polarized pure HD target for nuclear physics; <i>J-P. Didelez</i>	39

Measurements of $p(\vec{\gamma}, p)\pi^0$, $p(\vec{\gamma}, \pi^+)n$ and the E2/M1 ratio in the $N \rightarrow \Delta$ transition; <i>H-P Krahn</i>	41
Two- and Three-Body Break Up of Polarized ${}^3\text{He}$ by Polarized Electrons; <i>S. Nagorny</i>	42
Electric Polarizability of the Nucleon in the Nambu–Jona-Lasinio Model; <i>E. N. Nikolov</i>	44
Electron-Deuteron Scattering With the New Generation of Nucleon-Nucleon Potentials; <i>W. Plessas et al.</i>	46
Off-shell nucleon form factors in a coupled channels unitary model; <i>G.I. Poulis et al.</i>	48
Asymmetry Measurements with Polarized Electron Beams: Theoretical Perspectives; <i>M. Radici</i>	50
Spin Flipping at Storage Rings; <i>Yu.M. Shatunov</i>	52
High Precision Coincidence Møller Polarimetry for the SLAC Experiment E143; <i>P. Steiner et al.</i>	53
Probing Deuteron and Hadron Structure in Reactions with Polarized Deuteron; <i>Mark Strikman</i>	55
Proton Polarization Observables in the $(\vec{e}, e'\vec{p})$ Reaction on Hydrogen, Deuterium, and Carbon; <i>S.P. Van Verst et al.</i>	56
 Posters 	
Polarization of photon and electron beams by means of oriented monocrystal; <i>A.O. Aganians</i>	58
A Neutron Polarimeter for the Measurement of G_E^n ; <i>J.R.M. Annand et al.</i>	59
